

ChaturBiz

CORPORATE PROFILE

RESEARCH-DRIVEN DERMATOLOGY & COSMETIC SCIENCE

Engineered on proprietary *Trisome* & Microbead science.

A local partner to leading multinational dermatology groups, built on two in-house delivery technologies that define every formulation we bring to market.

INNOVATION

QUALITY

TRUST

Trisome Technology

Our flagship QbD dermal-delivery platform — the science engine behind the full portfolio.

Microbead Technology

Precision physical + chemical exfoliation, engineered within the Trisome platform.

ChaturBiz at a Glance

A technology-based, research-driven organisation operating across the full spectrum of dermatology and cosmetic science — a local partner to leading multinational dermatology groups, backed by experienced professionals from the Indian pharmaceutical industry.

18

Dedicated product categories across dermatology & hair care

177+

Individual formulations across skin, hair, body & personal care

360°

Fully integrated partnership, from R&D through distribution

02

Proprietary technologies, engineered entirely in-house

Our Mission & Vision

To enhance the effectiveness and safety of our product range as a guiding principle at every level — delivering research-based solutions to dermatological problems, with a commitment to patient wellness through quality skin and hair care.

Our Strategy

To be the partner of choice and one-stop-shop for multinational healthcare corporations entering or expanding in skin and hair care, with continuously expanding market presence and scientific leadership.

FLAGSHIP TECHNOLOGY

Trisome Technology

The QbD-based, tri-stage dermal delivery platform behind the full portfolio — see p. 03–04.

APPLIED DELIVERY TECHNOLOGY

Microbead Technology

Precision physical + chemical exfoliation, built on the Trisome discipline — see p. 05.

A LOCAL PARTNER TO GLOBAL DERMATOLOGY

ChaturBiz is a derma healthcare company operating in the dermatology segment of skin and hair care — backed by experienced professionals and advisors from the Indian pharmaceutical industry, bringing the scientific depth and market discipline to operate at the intersection of pharma and cosmetic science.

100%

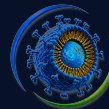

Dermatology-focused R&D

360°

Fully integrated partnership model

02

Proprietary in-house technologies

Trisome *Technology*

A fast-acting dermal delivery system offering superior rheological stability, penetration, and patient compliance. Trisome is a stable, patented mixture of cetylated esters, acrylic acid polymers, cetyl/stearyl alcohols, anti-oxidants and dual solvents — forming micelle and colloid particles distinct from liposomes, niosomes and other nanocarriers.

THE SCIENCE ENGINE BEHIND EVERY CHATURBIZ FORMULATION

01

DESIGN

Formulation planning built on Quality by Design principles, defining the target product profile from the first step.

02

DEVELOP

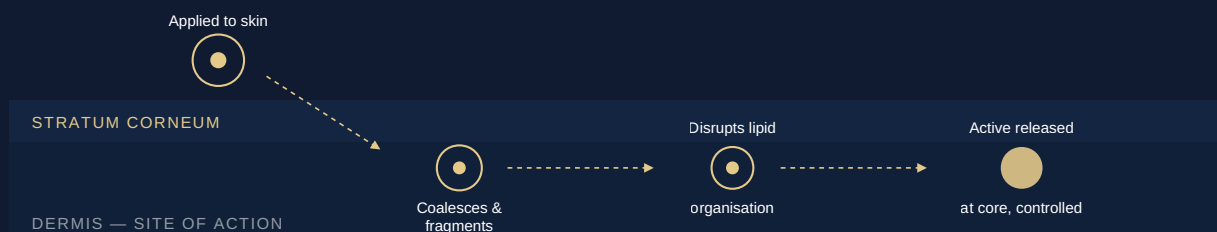

Rigorous optimisation and evaluation, refining efficacy, stability and safety before a product moves forward.

03

DELIVER

Validated, consistent manufacturing through to the finished product — quality carried through every batch.

HOW TRISOME NAVIGATES THE EPIDERMAL BARRIER

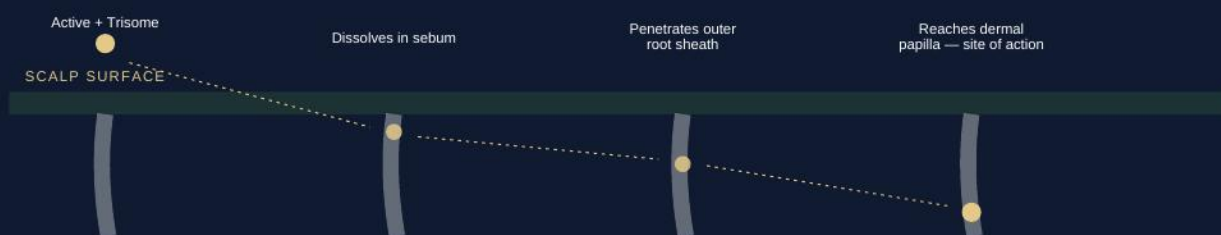

Structural similarity between epidermal ceramides and Trisome's cetylated ester / acrylic acid complex allows the carrier to navigate the epidermal barrier, coalescing at the stratum corneum before releasing actives in a controlled manner within the dermis.

Reaching the *Site of Action*

Trisome's transfollicular delivery route is the same discipline that governs every formulation on the Trisome platform — engineered to reach the target site with precision, from scalp surface to dermal papilla.

TRANSFOLLICULAR ROUTE — HOW TRISOME REACHES THE DERMAL PAPILLA

Structural similarity between triglycerides in sebum and the Trisome complex allows actives to dissolve in sebum and penetrate via the stratum corneal barrier of the outer root sheath — reaching the dermal papilla, the target site for hair & scalp actives such as Minoxidil.

Rheological Stability

Consistent viscosity and texture across the product shelf life, batch after batch.

Deep Penetration

Engineered to coalesce at the stratum corneum before controlled release within the dermis.

Patient Compliance

A fast-acting, comfortable-on-skin profile that supports consistent, correct use.

"The same Design → Develop → Deliver discipline governs every formulation on the Trisome platform — from first principles to finished product."

Microbead *Technology*

A precision exfoliation delivery system, engineered within the Trisome discipline and applied across select ChaturBiz haircare and skincare formulations — combining controlled physical exfoliation with targeted active release in a single step.

PHYSICAL

Micro-encapsulated beads provide gentle, controlled mechanical exfoliation to lift away dead skin and scalp cells.

CHEMICAL

Beads carry active ingredients — Selenium Disulphide, Ketoconazole, Salicylic Acid — releasing them precisely at the point of contact with skin.

COMBINED

Physical and chemical exfoliation work together in one step, for a thorough yet controlled anti-fungal, anti-dandruff result.

WHY MICROBEADS: LOCKING IN THE ACTIVE

Prevents active degradation

Encapsulation shields Selenium Disulphide / Ketoconazole from premature breakdown, preserving potency until applied.

Improves compliance

Removes the sulphur odour typical of unencapsulated Selenium Disulphide — a common reason patients discontinue use.

Skin & scalp-friendly pH

Free from irritant ingredients, formulated at a pH compatible with skin and scalp for daily use.

Featured Formulations

Selenium Disulphide

2-in-1 therapy wash for skin & scalp — with Tea Tree Oil, defends against dermatophytes, ringworm, dandruff.

Ketoconazole Shampoo

With Provitamin B5 — fights flakes, controls itch, effective for seborrheic dermatitis.

Salicylic Acid Wash

Anti-fungal body wash + shampoo — defends against athlete's foot, jock itch, toenail fungus.

360° Partnership, Built on Trisome Discipline

A complete, end-to-end partnership — from market access to regulatory affairs — so multinational partners can enter or expand in skin and hair care through a single, accountable relationship. The same Design → Develop → Deliver discipline that governs Trisome also governs our quality journey, from raw material sourcing to finished product.

Upstream

Market Access & R&D

Market access, research-based innovative products, applications support.

Core

Technical & Supply

Technical service, supply chain, and distribution.

Downstream

Regulatory & Manufacturing

Registration & licensing, manufacturing, international quality standards, regulatory & medical affairs.

QUALITY JOURNEY — EMBEDDED THROUGHOUT, NOT INSPECTED IN

Raw Material Sourcing → Formulation → Evaluation → Manufacturing → Packaging → Final Product

Quality & Compliance

Careful, quality-conscious sourcing of raw materials; consistent, documented process discipline across formulation and evaluation; and a responsible approach toward applicable regulatory requirements at every stage.

Consistency & Improvement

A focus on delivering consistent product quality batch after batch, with ongoing evaluation and refinement of products and processes — a professional, ethical approach to healthcare communication.

"This quality journey is not incidental — it is the direct output of Trisome's Design → Develop → Deliver discipline, applied consistently across every formulation."

18 Categories. 177+ Formulations.

A broad, technology-based portfolio spanning drug and cosmetic formulations across skin, hair, body and personal care — every formulation developed on the Trisome platform.

Face Care	29	Hair Care Cosmetics	13
Body Care	13	Moisturizing Products	7
Anti-Acne Products	6	Melasma & Sunscreen	6
Haircare Cosmetics (Shampoo/Serum)	6	Therapeutic Cosmetic — Psoriasis	5
Gynaec Range — Cosmetics	4	Skin Care Anti-Fungal / Antibacterial	3
Men's Grooming	3	Personal Care	3
Haircare — Drug Products	2	Gynaec Range — Drug Products	2
Hormonal & Local Anesthetic	2	Next-Generation Cosmetics	2
Pain Management Products	1	Vitiligo Product	1

Trisome-Built, End to End

Every formulation across all 18 categories — from face care to gynaecology drug products — is developed on the same Trisome Design → Develop → Deliver discipline, ensuring consistent quality regardless of category or format.

Microbead-Enabled Range

Selected anti-fungal and dandruff-care formulations additionally carry Microbead Technology — combining Trisome's delivery science with precision physical and chemical exfoliation.

What Each Category Covers

A closer look at all 18 categories — what each range includes and the actives that define it, drawn directly from the ChaturBiz formulation catalogue. Cosmetic and drug formulations across skin, hair, body and personal care.

Face Care

29

COSMETIC FORMULATIONS

Serums, creams, washes, toners, sunscreens, eye gels and peels targeting pigmentation, acne, hydration and photoprotection — actives include Niacinamide, Alpha Arbutin, Retinyl Palmitate, Hyaluronic Acid and graded Trichloroacetic Acid peels.

Hair Care

12

COSMETIC FORMULATIONS

Shampoos, serums, conditioners and oils for scalp health and hair growth support — formulated with Redensyl, Procapil, Anagain, Piroctone Olamine, keratin and botanical oils.

Body Care

13

COSMETIC FORMULATIONS

Lotions, washes, sprays and a mosquito-repellent cream for daily skin care, sun protection and targeted concerns — with Niacinamide, Zinc Oxide, Lactic Acid and Salicylic Acid.

Hair Care Cosmetics

06

COSMETIC FORMULATIONS

Shampoo and serum formulations for daily hair care and scalp maintenance, including caffeine, microbead-enabled and daily-moisturizing variants.

Moisturizing Products

07

COSMETIC FORMULATIONS

Everyday hydration range spanning face and body — ceramide-complex cream, prebiotic serum, anti-aging cream, and moisturizing face and body washes.

Melasma & Sunscreen

06

COSMETIC FORMULATIONS

Pigmentation and photoprotection range — day/night lotions and serums, an illuminating serum, under-eye gel, and sunscreen.

73 formulations in this group**6** of 18 categories shown**100%** Trisome-built

What Each Category Covers

Continued — targeted therapeutic ranges, intimate and feminine care, antifungal drug formulations, and grooming, all built on the same Trisome discipline.

Anti-Acne Products

06

COSMETIC FORMULATIONS

Face and body acne-care range — clear and foaming face washes, anti-acne lotion, salicylic acid body wash and truncal acne therapy lotion.

Therapeutic Cosmetic — Psoriasis

05

COSMETIC FORMULATIONS

Therapeutic shampoo, soap and body wash for psoriasis, plus advanced foot care and atopic dermatitis creams.

Gynaec Range — Cosmetics

04

COSMETIC FORMULATIONS

Intimate and feminine care cosmetics — anti-scar and anti-stretch mark lotions, feminine wash and feminine lubricant.

Skin Care Anti-Fungal / Antibacterial

03

DRUG FORMULATIONS

Topical antifungal drug products for skin infections — Luliconazole cream, Ketoconazole antifungal soap bar, and Amorolfine cream.

Men's Grooming

03

COSMETIC FORMULATIONS

Beard care range — nourishing beard oil, gentle beard wash and a strong-hold beard wax.

Personal Care

03

COSMETIC FORMULATIONS

Intimate hygiene wash and spray plus an under-arm brightening roller, formulated with sea buckthorn oil, lactic acid and kojic acid.

24 formulations in this group**6** of 18 categories shown**100%** Trisome-built

What Each Category Covers

Continued — drug formulations across haircare, gynaecology, hormonal and pain-management indications, plus ChaturBiz's next-generation and specialty cosmetic platforms.

Haircare — Drug Products 02

DRUG FORMULATIONS

Minoxidil formulations for alopecia and Ketoconazole formulations for antifungal / anti-dandruff scalp therapy.

Gynaec Range — Drug Products 02

DRUG FORMULATIONS

Terconazole vaginal cream for vulvovaginal candidiasis and Estradiol gel for hormonal therapy.

Hormonal & Local Anesthetic 02

DRUG FORMULATIONS

Testosterone gel for hormonal therapy and Lidocaine gel for local anesthetic relief.

Next-Generation Cosmetics 02

COSMETIC FORMULATIONS

Emerging formulation platforms — skin microbiome-support formulations and virgin coconut oil-based formulations.

Pain Management Products 01

DRUG FORMULATIONS

Diclofenac gel, a topical NSAID for localized pain relief.

Vitiligo Product 01

COSMETIC FORMULATIONS

A topical suspension/lotion formulated for cosmetic care of vitiligo-affected skin.

Capability & Credibility

Deep Segment Focus

Concentrated entirely on skin and hair care cosmetic and drug formulations — 100% dermatology-focused R&D.

Long-Term Partnership Approach

Strategic and financially stable, built to support long-term partner investments.

Established Relationships

Working relationships across KOLs, regulators, and stakeholders in dermatology and cosmetology.

All-in-One Value Chain

In-house supply chain and advanced regulatory affairs, covering the entire value chain under one roof.

Proven Market Entry Capability

A track record of venturing into new fields and building leading market partnerships.

Experienced Team & Advisory Network

Professionals with deep industry experience and excellent service standards throughout.

"One partner. Two proprietary technologies. A complete dermatology & cosmetic value chain."

Distribution

Pharmaceutical distribution, institutional business, retail & pharmacy networks.

Stakeholders

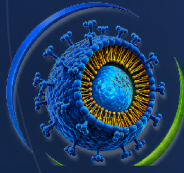

Healthcare professionals and strategic product-development partnerships.

Expansion

Regional market growth and international business opportunities.

BEST-IN-CLASS SERVICE

Reputed for the highest standards of operation and professional commitment to every partner — with advanced regulatory affairs capabilities and established relationships across medical and scientific institutions, dermatologists, and healthcare providers. *Service is our discipline.*

ChaturBiz

R&D IN DERMA & COSMETIC

*One partner. Two proprietary technologies — Trisome and
Microbead. A complete dermatology & cosmetic value
chain.*
